ABOUT US

Welcome to SOLE DentalTech, where excellence in dental products meets exceptional service!

As a trusted supplier with 30 years of family business experience, we take pride in delivering high-quality dental products for dentistry and orthodontics.

Our commitment to your oral health is unwavering, and we are dedicated to providing you with top-notch products and reliable service. Join us on this journey towards a healthier smile and experience the SOLE DentalTech difference today!

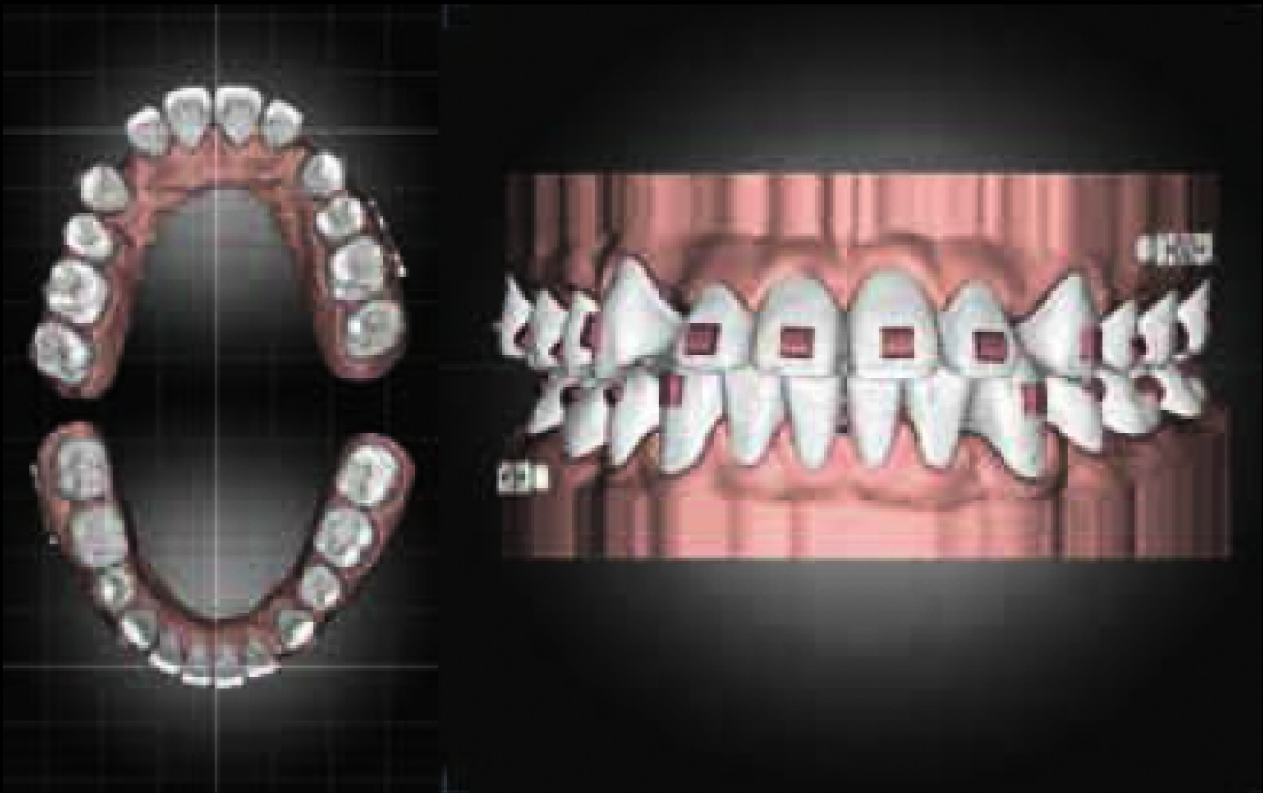

1 RETAINERS

Retainers are used to keep teeth stable after orthodontic procedures. In addition, they can also correct slightly misaligned teeth. Spring or expansion screws can be added to move teeth to the desired position.

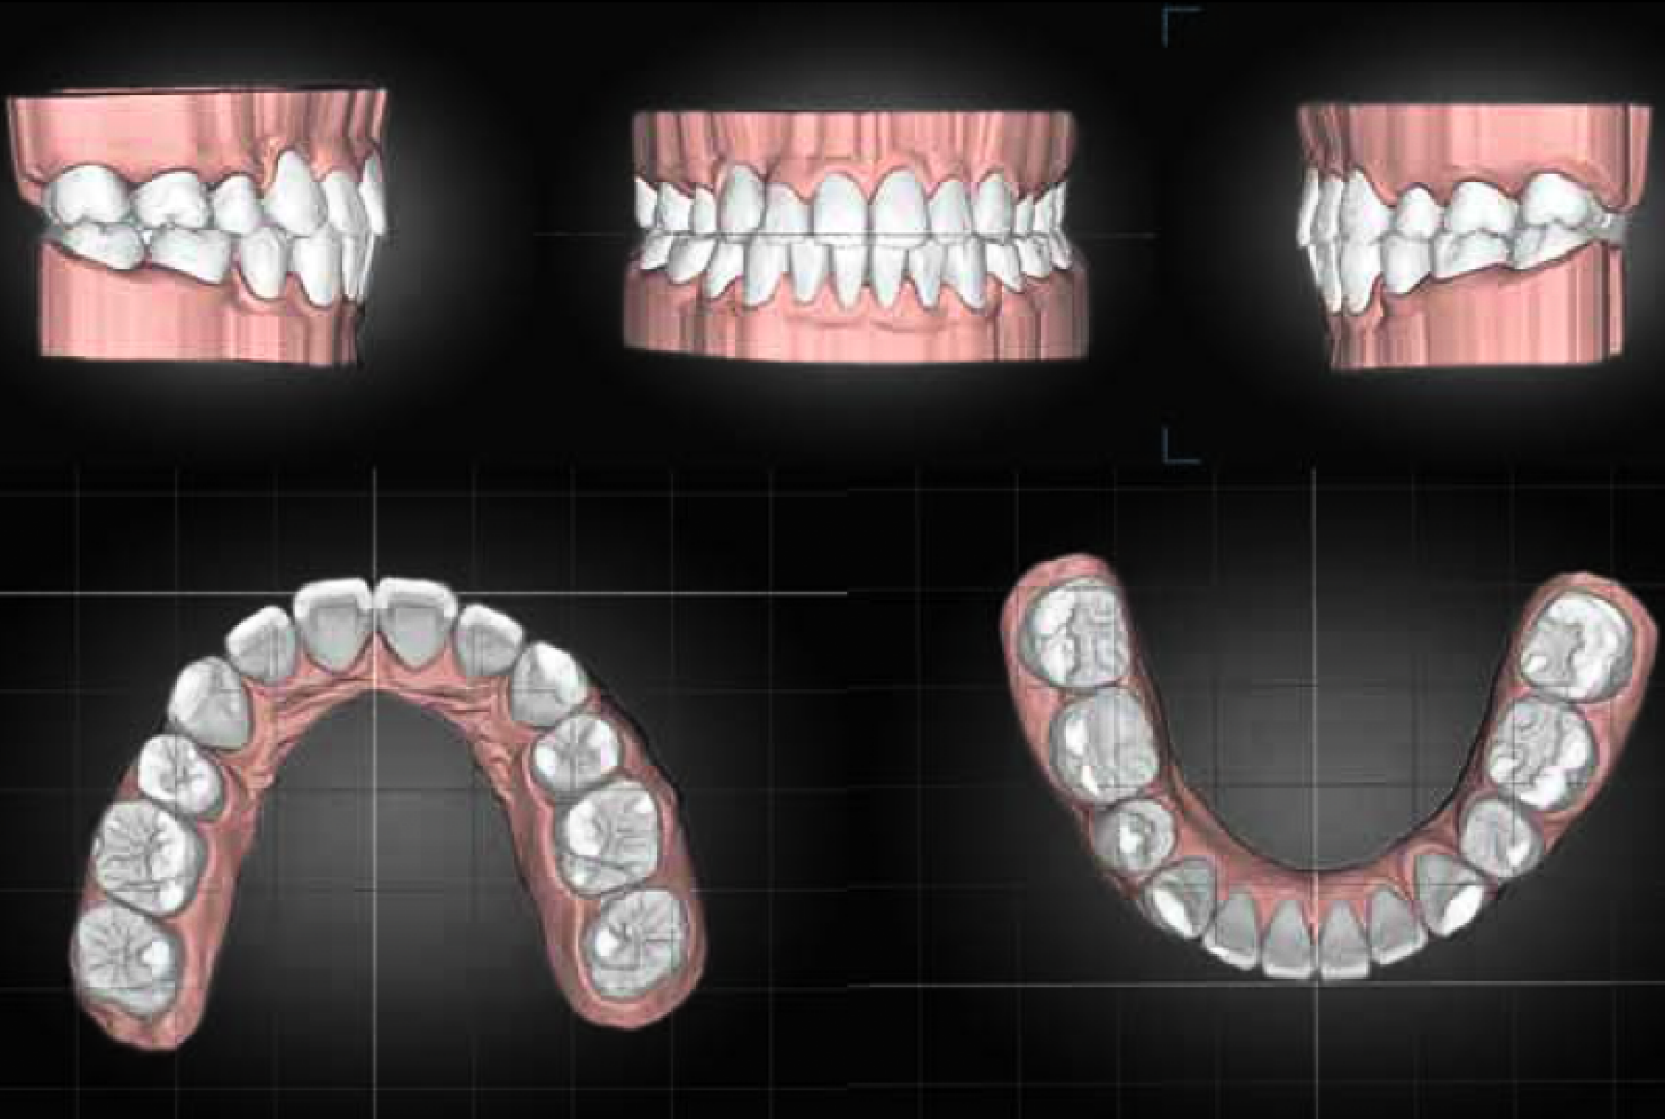

SOLE DentalTech offers many different designs and additional details cater to dentist's requirements

FIXED METAL APPLIANCES

Fixed metal appliances help regulate and control dental arch growth and the function of the appliance to create force, create space for crowded tooth areas and help increase the width and length of the dental arch.

In addition, Sole DentalTech also has many variations of instruments.
